---

## FRONTEND DEVELOPER

Passionate and result-driven Frontend Developer with extensive experience in HTML, CSS, JavaScript, and React. Collaborative team player who enjoys working with other developers to build high-quality web applications. Skilled in using platforms like Github to streamline project management and code collaboration. Committed to delivering exceptional results and continuously learning new technologies to enhance development capabilities.

---

## TECHNICAL SKILLS

HTML5	Bootstrap CSS	Axios/AJAX
CSS3	Git/Version Control	JSON
JavaScript(ES5/ES6+)	Unit testing	Firebase
React	Context API	Supabase
TypeScript	Redux	Technical Writing
Tailwind CSS	APIs	Terminal Command Line

---

## EXPERIENCE

**SQI College of ICT**

**Oct 2022 - Present**

**Tech Instructor/Frontend developer**

Accomplishments:

Taught students concepts of computer science and frontend web development.

Developed simple mechanisms to help student understand how the internet works and what computer science is all about.

Analyzed websites for students to show them the codes that were written for those websites.

Assisted in the management and maintenance of the institute's frontend interfaces, ensuring high quality user experience and functionality.

Successfully converted Figma designs into live sites, using HTML, CSS, JavaScript and React. Utilized API endpoints to improve site functionality and user experience.

Contributed to the development of efficient and scalable code for improved site performance. Demonstrated proficiency in frontend development technologies, including HTML, CSS, JavaScript, React and responsive design principles.

## **Genesys Internship Project**

**Nov 2022 - June 2023**

### **Frontend developer**

**Project link:** <https://geek-lms.netlify.app/>

#### **Accomplishments:**

Facilitated meetings with designers, and other developers to discuss feature design and integration strategies.

Developed responsive frontend interfaces from Figma designs using React, HTML, CSS, and other web technologies, resulting in a 20% increase in user engagement.

Implemented secure authentication systems using React, Axios, and Context API to protect user data and enhance overall platform security.

Collaborated with other developers on the team using Github to streamline code review and improve development workflows.

Participated in daily scrum calls, providing updates on tasks and collaborating with team members. Managed tasks and workflow using Jira, ensuring timely completion of projects and tasks. Worked collaboratively with team members using GitHub to ensure efficient and effective project management.

Participated in team meetings using Discord to discuss project updates, provide feedback, and collaborate on project goals.

## **Enoverlap Internship Project**

**May 2023 - June 2023**

### **Frontend Developer**

#### **Accomplishments:**

**Project link:** <https://vf-iota.vercel.app/>

Collaborated with designers and developers to define feature requirements and design specifications, ensuring easy integration and optimal user experience.

Developed pixel perfect frontend interfaces from Figma designs that reduce bounce rates by 15% and were responsive across all screens.

Implemented a search feature using JavaScript (ES6) to improve user search experience and reduce search time by 30%.

Collaborated with other developers on the team using Github to streamline code review and improve development workflows.

Participated in team meetings using Microsoft Teams to discuss project updates, provide feedback, and collaborate on project goals.
