SAMSON A. ADERONMU

Samsonaderonmuv2.netlify.app | linkedin.com/in/samsonaderonmu | Github.com/superior212

Front-end developer with a strong focus on results and vast expertise in HTML, CSS, JavaScript, and React. Build high-quality web applications with other developers as a collaborative team player. Knowledgeable about organizing project management and code collaboration using platforms like Github. Devoted to producing top-notch results and learning new technologies to improve development capabilities.

TECHNICAL SKILLS

HTML, CSS, Javascript, React, Angular, Typescript, Terminal Command Line	Tailwind CSS, Bootstrap CSS, Unit testing, Context API, Redux, APIs, Axios/AJAX	Firebase, Supabase, Git, Node **Technical Writing**

EXPERIENCE

Software Engineer/Tech Instructor - **SQI College of ICT**   **Oct 2022 - Present**

- ❏ Collaborated with teams of developers to design and build responsive web applications using agile best practices
- ❏ Built semantically structured and responsive web applications for mobile and desktop devices
- ❏ Maintained detailed documentation and git history for all projects and used Github in a team environment
- ❏ Taught students concepts of computer science and web development
- ❏ Developed simple mechanisms to help students understand how the internet works and what web development is all about
- ❏ Analyzed websites for students to show them the codes that were written for those websites

Frontend Developer - **Learnable**   **Nov 2022 - July 2023**

- ❏ Facilitated meetings with designers and other developers to discuss feature design and integration strategies
- ❏ Developed responsive frontend interfaces from Figma designs using React, HTML, CSS, and other web technologies, resulting in a 40% increase in user engagement
- ❏ Implemented secure authentication systems using React, Axios, and Context API to protect user data and enhance overall platform security
- ❏ Collaborated with other developers on the team using Github to streamline code review and improve development workflows
- ❏ Participated in daily scrum calls, providing task updates and collaborating with team members. Managed tasks and workflow using Jira, ensuring timely completion of projects and tasks. Worked collaboratively with team members using GitHub to ensure efficient and effective project management

Frontend Developer - **Enoverlap**   **May 2023 - July 2023**

❏ Collaborated with designers and developers to define feature requirements and design specifications, ensuring easy integration and optimal user experience

❏ Developed pixel perfect frontend interfaces from Figma designs that reduce bounce rates by 15% and were responsive across all screens

❏ Implemented a search feature to improve user search experience and reduce search time by 30%

❏ Collaborated with other developers on the team using Github to streamline code review and improve development workflows.
